

LaFleur's News

~ August 2017 ~

Please consider **YEAR-ROUND CLASSES** for your child in **Gymnastics and/or Swimming**. Consistent participation is crucial to your child's development. Once we establish a class that is a good fit for your child we strongly recommend that you stay in the same class until next summer.

We can help them develop skills they will need for the rest of their lives.

The President's Council on Physical Education and Sports states,
"Gymnastics develops upper body and abdominal strength
better than any other activity."
